

I am a bilateral late deafened adult. I have captioned phones in my house but I am limited to text messages on my cell phone, I would like to be able to make phone calls when I am away from home but in order to do so I need a captioned cell phone. I understand that the technology is available and I would like you to permit it to be used ASAP.

I can't text to my home or my family or in an emergency and I would feel much more at safe and at ease if that were available to me.

Thank you

Donna J. Penman
