

Please do not change FCC regulations to allow the F word and nudity on network television -

I cannot express my concern strongly enough. the world we live in is degrading at such a rapid pace. Values and Morals seem to be a thing of the past and it is so difficult to raise children in a society that doesn't consider standars and values important.

For the sanctity of our homes and our children PLEASE do not allow this to pass. Please protect our children! Please.

I completely accept that the worlds standards have changed and that what i consider wrong or immoral may not be immoral to you - or others, but we should have the right to raise our children in innocence. We should allow our children to be free off filth. If programing is changed and the f-word and nudity are allowed to be viewed by network television and during hours that our children would still be awake we run the risk of taking away their innocence. this is wrong on so many levels. Please do not allow this. please protect our children and society. please.

thank you
