

This is so ridiculous, you already have cable tv...America does not need to stoop any lower! The persons pushing for this do not care about children or adults, all they care about is their own agenda. I do not have cable for this very reason, if I want to watch something I will watch Netflix or rent a movie online. I am 56 years old, I have seen a lot in my lifetime, please do not take away one of the few remaining things that are fairly clean.

Please do not lower the media standards, if people want to watch nudity or hear the "F" bomb they can go rent something or watch cable. Or for that matter they can go to a mall or a campus and hear people use that language all the time.

Please do not take away one of the last areas a parent or any adult has control over.

Thank you.
