

In the eyes of the world, the United States has been the one developed country - in some eyes too developed - which has stood for decency and morality in what is portrayed over the airways. Lessening and not enforcing those standards of decency which set us apart from the world will take us another step towards our Gomorrah. For our children's sake, for the future of our country, for a better world which might continue to include respect, love, and decency, please - PLEASE - do not loosen the standards of our airways regarding decency nor turn a blind eye to those few people or companies who would flagrantly violate those regulations which we all have come to rely on.
