

Please DO NOT DROP THE DECENCY STANDARDS that are now in place. They are not very good, but at least our poor children are not exposed to the very worst that the world can offer. The children hear and see enough of the world filth in their everyday lives and through the media now. Because of this, there is very little respect, tolerance or personal control in the actions of the younger generation. The adults in the situation have to exhibit some control so that the children will know it is necessary and learn to use it themselves. Let our children be children a little while longer!
