

Please, do not drop your decency standards. Our children are already exposed to "too much". No program can be made more engrossing by allowing foul language and frontal nudity. I choose not to take my children to movies with that language and nudity and would like to continue watching television, knowing that these things will not pass from the screen to my living room. In fact, I think there should be more restrictions for daytime hours, where little ones are watching! There is already enough sexual content around as it is. No more...protect our kids.
