

I do NOT agree with changes to allow for the F-word and female frontal nudity to be allowed on public airways. I already never allow live programming in my home because of the indecent commercials that come on the air without notice. By the time they're on the screen, it's too late to change the channel. We need to tighten what's allowed on the airways not loosen it. Our children and ourselves are already exposed to way too much vulgarity, nudity, and indecency. We need to bring back basic human values and virtue.
