

I would ask the FCC to seriously consider not allowing the rules regarding language, such as the 'F---' word and additional nudity to be relaxed on television. In my estimation, such a decision is detrimental to our society and to our future due to the impact that it will have on our children. Children have such easy access to television and to allow such easy and readily available access to our children is ultimately a lowering of standards and the demise of our country. If such is to happen, my family and I will no longer utilize cable television and it will be my mission to encourage family and friends to boycott cable television or any service that promotes such.

Thank you for your time and consideration in this matter.
