

I think it is reprehensible to allow even more vulgar profanity than is already on TV and worse yet, frontal female nudity. I don't want to see these as an adult and they are certainly not appropriate for a child to accidentally view. Despite what the media presents, it isn't considered appropriate in mainstream society to use the F-word toward another person or to use it in a public or business setting. Hollywood tries to make it seem normal to have one's conversations bleeped throughout, but it is vulgar and inappropriate. Please do not approve this legislation. Thank you.
