

I'm disgusted that you would even consider having the f word and full frontal nudity on prime tv. This world already has so many morality problems and broken homes over that crap that it we don't need it accessible for our children to be able to see so easily. If this goes through I will cancel cable immediately and inform and many of my friends and family and I can to have them do the same. PLEASE do not allow this on prime time tv. Leave it on pay per views channels for all of those Perves to sell their souls to!
