

I am NOT ok with the proposed changes to TV decency standards to allow more profanity and female frontal nudity on primetime TV. If you allow it, I will make sure that our cable is set to time off much earlier in the day - and will even consider getting rid of it altogether.

In a time when people can get much of their television on the internet, I think this is a pretty dumb move. We can pick and choose more carefully what our families watch and we will NOT be picking cable if you continue with this.
