

Please do not reduce the standards for broadcast nudity and profanity. There is no reason to degrade civility further. Just because it doesn't bother some, doesn't mean it is acceptable to everyone. It is clearly not acceptable to everyone. A large percentage of American viewers find indecency on the airwaves as objectionable. Please do not allow this to happen. Television and radio entertainment can be just as entertaining without full nudity and gross profanity. It can be done. In fact, Hollywood is discovering that clean inspirational stories are just as attractive to the public as dark and profane stories. Please keep television and radio clean. If the audience wants something else they can elect it via online content or selected movies. But broadcast television and radio should be kept clean to respect the largest audience possible.
