

I strongly oppose the FCC relaxing the current rules on profanity and nudity. Profanity and nudity should not be available on any television programming. These items are offensive to many adult viewers and extremely inappropriate for children. Viewers who wish to watch programming with profanity and nudity have the option of viewing this type of programming online or through video rental. I am very dismayed when I watch programming that contains any type of nudity (even if it is only fleeting, brief or partial) or any profanity (even if it is considered a not so offensive word). The language on TV now is much worse than it ever was when I was growing up. Please, if you change the standards regarding profanity or nudity, make them tougher, not more lenient. Thank you for your consideration.
