

Really...I can't believe the F-bomb and nudity are coming to T.V. Why? What's the point? If this happens, the T.V. plug will be pulled at my house. I already am careful about what my 14, 12, 10, and 7 year old watch. Now I won't be able to trust any T.V. viewing. Ever heard about a child and their social, emotional, and physical development? Each of those skills are affected by what they take into their bodies. Including T.V. watching. Watching and taking toxic things into a body can stunt growth as well as their processing skills and their ability to cognitively understand the world around them. Way to go!!!
