

This is to inform the FCC that I oppose the proposed changes to the Broadcast Decency Standards, specifically allowing explicit profanity and "non-sexual" nudity.

As it is, it is difficult enough to find family friendly programs. Passing these proposed changes will make it even more difficult as programs slowly, or not so slowly, take advantage of the new standards.

There is little debate over the influence of today's media. Eliminating these restrictions will encourage the youth, and even adults, to become more vulgar and less respectful, of themselves and of others.

Please do not allow the profanity and the nudity on broadcast TV
