

As a voting citizen of this country, I implore the FCC to not discontinue the regulations presently in place relative to the controls and limitations of what may be seen and what may be heard on public television. For the sake of decency and for our children across the nation, these regulations act as guards against the blatant use of foul language that is not acceptable in the schools, employment, and general populations arenas. Nor do I believe it should be allowed that nudity be acceptable over the airways when the same is unacceptable in the the same above areas. Because we take care of the animal world does not mean we should become part of it.
