

Under no circumstances do I want the ban on profanity and nudity dropped. It is difficult enough to select the proper programming for our family to watch. It feels like the public is getting nudity, sex, homosexuality & profanity shoved down our throats. We are tax paying, television paying, law abiding citizens & we would like to have a voice also. Do the people not realize the impact this is having on children & also on the perverts who are watching all this garbage. This only enhances the perversity level for these people. Thank you!
