

I would like to express my opinion that explicatives and nudity, if partial or brief, should not be allowed on the public airwaves. I am also concerned about the amount of violence that is being aired. Family-friendly programing on the public airwaves is becoming harder and harder to find. It is beginning to leave family-friendly cable stations and prerecorded programs purchased at the store the only options. My family cannot afford cable T.V. We rely on public stations. Please help to keep them child-safe. Many of us adults will appreciate it also.
