

It has come to my attention that the FCC intends to relax the laws on broadcast profanity. As a parent, grand parent and a trainer not only for National Elevator Industry as well as training insurance claims adjusters. Agreeing with me is my wife Dr Debra EDD and zone superintendent for Jeffco Public Schools, she is also superintendent of Columbine HS. We urge a more stringent policing of profanity, nudity, and sexually explicit content in our communications and entertainment industries. My wife can tell you , with studies to back up the conclusions, that the level of profanity in a culture has a direct effect on productivity, crime and other very costly and destructive behaviors. Do what is right, moral and decent gentlemen and dont give in to the industry leaders that dont care about our kids or our country. Thank you.
