

Nudity should be allowed on TV. It is all over the internet anyway, so we are not keeping kids from seeing it. I believe that if people see more nudity, they would be more open about sexuality and sex issues. In Europe, nudity is commonplace, and they have no issues with it and actually have a smaller rape number compared to countries that don't allow nudity. If we suppress nudity, there are consequences, such as rape and more. The more we know, the more open people will be with nudity.

Please allow nudity on TV in the USA. We are eons behind other countries and need to get over it.
