

As a mature citizen, I am shocked that such vulgar language and nudity of the female body is being considered for TV without consideration for the extensive knowledge that clearly states repeated viewing and hearing of material, such as sexual, violent activities reinforces a behavior and while on TV may even offer passive condoning of the behavior. Even with parental controls, this is still being viewed by individuals and children who do not exercise such control and are being sexualized at a very young age. Please consider the higher ground in making decisions such as this.
