

The FCC is a joke. I stopped watching TV years ago because I was sick of the violence, pedophilia, sexual innuendo, social engineering, rape, murder, false history, etc... the fact that the FCC is now considering allowing profanity and soft porn is no surprise. I absolutely oppose the further dumbing-down of America, and the degradation of decent, civil life. For this claimants knowledge is with the query for the law, rule, or code with the proper parse syntax grammar for the allowance for the FCC for the degradation of the public bandwidth-conscience by this perversion!
