

Please do not lower standards or increase leniency in protections for the public against nudity, offensive language, or sexually explicit or graphic portrayals in radio, television, internet or other media sources. The FCC has a responsibility to ensure media are free from material that is inconsistent with community standards. As this is a difficult standard to meet, please hold to a high standard of protection.

No one NEEDS expletives, nudity, or sexually explicit material for entertainment, personal enrichment, artistic expression or any other purpose. No one was ever hurt or deprived for lack of this material in the media. However the FCC will create a situation that creates harm and offense by allowing this material.

Anyone who is motivated to expose him/herself to this type of material is able to do so without exerting great effort. It is readily available for those who want it.
