

Please do not change the current FCC indecency standards that would allow television and radio stations to broadcast expletives and nudity on the public airwaves, even fleeting.

It is my opinion that these laws are not being strictly observed now. You may not believe it but many, people are storing their t.v., or just not watching. The industry is certainly not winning a reputation of caring for our children, and people are not happy.

Relaxing these policy will not have any positive effect. Please reject all proposals that allow for expletives and nudity, or sexual content on FCC licensed stations.
