

FCC DO NOT drop the ban on profanity / nudity on TV.

There is already too much of this on T.V. now. This is important for viewers to not allow programmers to stoop so low for ratings. Showing and saying everything is not creative and dumbs the programming down. Using our imagination is what makes us human. Regular T.V. is our last option for good programming aside from creating our own movies/shows and a select group of producers in the movie industry.
