

Please reconsider your current plan of action to allow new swear words and female nudity on broadcast television. I firmly believe that these things could only serve to diminish the wholesome family values that made this country great.

Television is too easily accessible to children. Realistically, parents can't monitor and censor what their kids see 100% of the time. Please consider the ramifications this could have on a society that more and more each day becomes deteriorated by sexual indecency.

Thank you for your consideration.
