**AFFIDAVIT OF SANDR STORWICK**

State of Washington ]

King County ]

I, SANDRA STORWICK, attest that my statements are true to the best of my knowledge.

**Comment** round for ET Docket No. 03-137 and WT Docket No. 12-357.

1. My name is SANDRA STORWICK . My address is 12828 NE 75TH STREET KIRKLAND WA 98033 .
2. I am a licensed massage practitioner and home maker . I have university degrees in Education and International development.

3.

I am an individual who is very sensitive to electromagnetic radiation. Approximately 20 years ago, I began having symptoms of headaches, dizziness and nervous system problems whenever I used or was in the proximity of cordless phones. I found that I experienced the same symptoms when I used a cell phone. I am unable to use wireless computers (my computer equipment is all wired and that poses no problem) . Now as the use cell phone technology, wifi and other wireless technology is becoming more wide spread, I am feeling more and more limited by what I can use and be around. I am extremely concerned about the use of wifi on airplanes as this means that now air travel will also be a challenge for me and others who are sensitive to electromagnetic radiation. I am unable to use toll bridges or freeways that use wireless radio wave tolling systems are so intense, it takes my body weeks to recover. My concern is not just for myself, but it is more for all the others who are unaware of the health effects of wireless HF radiation, all the children and unborn babies who are being exposed to this radiation are being prevented from reaching their full potential. As the use of wireless technology has expanded, more and more independent research has been done.. linking exposure to adult and childhood nervous system diseases such as ADHD. Autism spectrum disorder, Anxiety, Alzheimer's and cancer (leukemia and brain tumors especially ) I believe that HF (radio and microwave radiation ) should not be used at all - as it has been proven to me through my experience and also

through countless research studies that it is toxic to the human for, Here are just a few examples of respected research. [aaemonline.org/pressadvisoryemf.pdf](http://aaemonline.org/pressadvisoryemf.pdf), [neilcherry.com/documents/90\\_m2\\_EMR\\_Evidence\\_That\\_EMR-EMF\\_is\\_genotoxic.pdf](http://neilcherry.com/documents/90_m2_EMR_Evidence_That_EMR-EMF_is_genotoxic.pdf), [magdahavas.com/wordpress/wp-content/uploads/2010/11/Blake\\_Levit-Henry\\_Lai.pdf](http://magdahavas.com/wordpress/wp-content/uploads/2010/11/Blake_Levit-Henry_Lai.pdf)

The frequencies that being used in wireless systems is not compatible with the human electrical system . For me – I know that how I am feeling is linked to the presence of wireless radiation as - as soon as I turned these devices off, I immediately started feeling better.

4. Thousands of scientific studies have shown negative impacts of EMR on human health, even at low levels of exposure. The most commonly accepted guidelines are the Building Biology recommendations that list 1,000 microwatts/m<sup>2</sup> as the threshold for “extreme concern” ([http://www.baubiologie.de/downloads/english/richtwerte\\_2008\\_englisch.pdf](http://www.baubiologie.de/downloads/english/richtwerte_2008_englisch.pdf)). On May 31, 2011, the World Health Organization's International Agency for Research on Cancer (IARC) classified radiofrequency fields as “possibly carcinogenic to humans.” The FCC does not use biologically determined guidelines that affect health, but rather uses a standard that measures thermal heating of biological tissue. The premise that there are no adverse impacts of EMR on the human body until it is cooked is completely ridiculous.
5. I urge the FCC to adopt new RF safety guidelines that take into account published research on the biological effects brought on by the ability of RF signals to communicate with living tissue, and more specifically, to consider the Building Biology guidelines for human health. Even though I feel that HF radiation should not be used at all. I am content to ask as an interim step - could we at the very least adopt the baubiologie guidelines.

Respectfully submitted by
