RE: Docket #03-137
Docket #12-357

To Whom It May Concern:

Please investigate and demand that Nevada Energy (NVE) and the Public Utilities Commission of Nevada (PUCN) THOROUGHLY test and vet the EMF and RF radiation standards emitted with the Smart Meters being installed in the State of Nevada.

We have had house fires in our area, initiated at the site of smart meters. We have people in our area who cannot live in their homes because of the emission of the toxic radiation. We have others who have a general feeling of malaise and loss of vitality, unexplained with any other cause other than the recent installation of a smart meter.

The "testing" submitted by NVE in December, 2011, determined the smart meters to be completely safe, did not take into consideration any long-term testing. Even the World Health Organization's International Agency for Research on Cancer classified radio frequency electromagnetic fields as a Class 2B possible carcinogen. <http://electromagnetichealth.org/electromagnetic-health-blog/iarc-rf-carc/>

A recent BioInitiative document, just published December 31, 2012, studied, researched and tested RF radiation for over 20 years. This study was contributed to by 29 scientists, PhDs and medical doctors from 10 countries and the health results are astounding. www.bioinitiative.org. It is a lengthy document, but a quick review of the Table of Contents will suffice to show more than ample evidence of deleterious health effects of RF. We urge you to read it.

We have been fighting smart meters for well over a year and the local NVE and PUCN are not heeding our concerns. Instead, they have implemented an expensive "opt-out" program, when instead they should be implementing an "opt-in" program for those who want the dangerous changes that smart meters bring to our society.

What we need are RF and EMF emission standards, based on the protection of our health, not on numbers that local agencies generate. We do not trust NVE or our PUCN to be honest with us about these emissions. Please protect the people of this country.

Thank you,
Carole Fineberg
