

I am asking the FCC, which is tasked with the job of monitoring the communication of the United States, to begin their own independent investigation into the actions of the Major Networks (ABC, NBC, CBS, PBS, etc.) and their News subsidiaries, which use the public airwaves to relay the news. It is my belief that these networks have been in collusion with the current Presidential administration, and as a result have been complicit in perpetrating a crime against the American people by helping bury the story about the terrorist attack on Benghazi. Also, the story released, that the siblings of Major News Networks Presidents are working inside the White House, and may also be directly related to the Benghazi cover-up smells of nepotism. If something is not done to help ensure the journalistic integrity of our public news, then the people will be left in unfortunate quandary. Such an investigation into whether these News networks have violated the public trust, and/or their licenses would benefit our society as a whole.
