

I have invented a new condom that I am seeking patent protection on at this time. The problem with AIDS and other STI's are that there must be more education about safe sex. This is something that I feel that FCC should relax on when it is dealing with a company or doctor tastefully demonstrating new products to encourage our youth and others to begin using these new short condoms which fell like you are using nothing at all! But millions of people will contract diseases due to the fact that we cannot publically educate people with the current FCC laws.

FCC IS ACTUALLY KILLING PEOPLE BY NOT ALLOWING CONDOM COMMERCIALS TO EDUCATE PROFESSIONALLY AND WITH INTEGRITY EVEN.

Thank you kindly for your consideration.
