

The broadcasting medium, the atmosphere is the property of the American people and you are charged as public servants to protect the best interests of the American people, men, women and children. Moral filth, word or deed, audio or video never serves the best interests of the whole American people, but rather serves prurient interests of a depraved minority. Broadcast obscenity in any form debases the culture by undermining standards of behavior and speech. Please act to uphold high standards by rolling back the current permissive practice toward infraction to punitively discourage any violation with very strong punishment.
