

Re: The proposal to allow brief nudity on non-cable TV channels. I urge you to reject that proposal, primarily in the interest of protecting children who watch the non-cable channels. I do not think the proposal is necessary on any level and am concerned that the result of approving it would further degrade the quality of television. What we watch affects us, and I find it increasingly more difficult to choose TV shows that enrich us. Please do not lower the bar any further. Thank you for your consideration. Mary Devlin
