

I don't understand why I cannot choose between cable providers in my area.

In my township we have Comcast(Xfinity) and Charter cable. But I am only allowed to receive Comcast at my address. It would seem to me that it would promote better television, internet, telephone if there were a little competition. I am allowed to change telephone carriers even though the lines are owned by ATT and I am allowed to purchase natural gas fro different suppliers even thought the pipeline belongs to Consumer Energy. Who is controlling the access to cable TV companies? It'd time to fix that.
