

Dear Commissioner,

For docket number 13-86, we strongly oppose to your new policy of allowing all television channels and radio stations to broadcast nudity and profanity any time. Otherwise, it will be deleterious to future generations with catastrophic consequences!

The current law has already been allowing nudity and profanity to be broadcast on adult channels and between 10 p.m. and 6 a.m. on all channels. But we also do need to protect our regular and family channels as well as our youngsters and children who should not be vulnerably exposed to those low-class shows at all times with nudity and profanity. This new policy basically means the degeneration of future generations of the United States!

Parents have the right to teach children appropriately and opportunely. This new rule makes the parents helpless and the situation unmanageable for them!

Moreover, it will give rise to a huge increase in nudity and profanity on regular television. TV channels will take advantage of these to attract viewers and advertisers. There will be all kinds of programs showing nudity with different excuses.

We strongly oppose to your new policy of allowing all television channels and radio stations to broadcast nudity and profanity any time. Your understanding is appreciated.

Sincerely,

Y.C. Chan
