Re: GN Docket No. "13-86"

To Whom It May Concern:

I am writing in regard to your upcoming issue to change the current broadcast indecency policies or maintain them as they are now written.

In my opinion, the laws are now so loose that we may as well do without any laws whatsoever. That certainly would put a lot more people out of work completely.

Freedom in the broadcast field and the media has now been taken to a whole new level. Any kind of new perversion is welcomed. It's not only the children who have to be protected from this media, but people of all ages who are exposed to this distorted view of the norm.

How much more before we destroy ourselves as a nation along with those who look to us as an example? Our enemies truly have found the greatest weapon of all.

A very concerned citizen,

Terry Krocker
