

I am writing to tell you that I am not favor of nor do I want to see more nudity or hear more profanity on public Television. As it is, I am very concerned and disappointed by the level of the mature content that is currently allowed. In a society where good is still presumably the better part of who are and who we desire to remain; it is detrimental and counter productive to promote and/or exemplify material that which is still considered lewd and/or obscene, and especially so to children who are learning and forming their world view.
