

Public TV is too vulgar already. We have a duty to protect our children and part of that duty should be to have public television shows be suitable for them to watch. Please do NOT allow more explicit content to infiltrate our airways. In fact, I propose the FCC reign in the networks and impose harsher fines and penalties for content that is explicit that gets aired.

Additionally, due to the amount public outrage at the current proposal, allowing the proposal to go through could have economic repercussions due to the number of people canceling their current service to protect themselves and their children from the explicit content. Please do not allow any more explicit content to infiltrate into our programming.
