

I am opposed to this change that would allow deregulated program content during family viewing times. There must be a place where children can watch main stream television, (Non-Cable channels) during prime time veiwing hours and not be subjected to vulgarity, and pornogrophy. If main stream television channels continue to try to immitate cable channels, you will lose even more of your viewing audience, starting with my family.

The FCC is supposed to have American's best interest in mind. With this proposal from the FCC and now the IRS targetting conservative Americans I'm starting to see my government as being an enemy instead of being by the people and for the people.
