Subject: FCC relaxing rules for broadcasting nudity, vulgarity and lewd behavior during primetime hours of television programming, especially available to children and minors.

I strongly advised and urge the FCC NOT TO RELAX any programming rules or regulations concerning the broadcasting of nudity, vulgarity and lewd behavior during primetime hours of television programming, especially available to children and minors. As a matter of fact there should be more restrictions to said type of programming currently available.

Whether or not this type of programming is currently available from other media sources or not, TWO WRONGS DO NOT MAKE A RIGHT. I am a Veteran of the United States Army with an Honorable Discharge. The Honest Respectable Values that made this country great are in part why the movie and television industry even has the freedom to earn an income. The move to promoting or accepting such soft pornographic and violence oriented programming is a PROVEN DETRIMENT to our youth and society as a whole.
