

Please do not relax the boundaries. It is hard enough raising kids in this world to be decent well adjusted adults, with a foundation of morals, without putting more weapons in the enemies hands.

Why do this? What good for society will come out of it? There is enough garbage on commercials, cable TV, in the movies and on bulletin boards to try and counter. We don't need it more mainstream. It makes no sense. Nothing good can come of it except to make some people that will exploit our children - more money. We have to draw the line and not cross it. Let's draw it now before we are that frog in the pot and literally slowly destroy ourselves.

Thank you for listening.
