

The FCC mission statement includes the words, "To be an agent of positive change." There has already been TOO MUCH of FCC's "positive change". In 1988 the word "ass" was not allowed to be spoken on TV when addressing a human body part. I want REAL positive change that includes a return to THOSE standards. The relaxed standards just since 1988, that have given us more filth and degenerative values, have only been positive for REPROBATES! I fail to see the FCC doing its job. I fail to see the decision makers within the FCC listening to the general public who prefer programming such as "The BIBLE", "DUCK DYNASTY" and the like. We, the general public, do not need any more of your "positive change" that includes profanity, nudity, violence, etc.
