

Please do not lighten your regulations on what is allowable on local television and radio. As a parent, I should be able to make the choice on whether or not I want to expose my child to that type of language or nudity. If it becomes common place on family channels or radio, I have no way to protect him except for choosing to not watch or listen at all. Please do not allow this filth to enter our homes. Children are innocent and you are taking that from them if you proceed to lower your rating standards.
