CG docket # 13-24-13-123

Daar FCC;

I do not mind pushing caption on my phone to enable captioning as it is very simple and takes only a fraction of a second to do.

This simple step can save the taxpayers

(me & you) lots of money better used in our hands than the government.

As a deaf veteran I do appreciate the ability to use the captioncall phone after many years of not being able to hear most women on the phone. However I don't believe every call from everyone who picks up one of these phones should be billed to the taxpayers !!

As a senior citizen, Veteran and a student of history I understand how Govt. programs get out of control in their unending quest for ever more taxpayer dollars.

Please continue the program as is. One simple touch on the screen could save millions in not too long a time I'm sure.

thank you

Mark Sweeney
