

I am horrified and greatly opposed to allowing the "f" word and other profanities on radio and T.V. Turning it off isn't enough when others are exposed to it. I don't watch certain shows on T.V. already due to their graphic violence but am exposed to them in commercials DURING PRIME TIME!

My children were exposed to a nail shot into a man's eye in a commercial during the news in prime time. I don't want to bring profanity and smut there too. There is certainly artistic nudity, but once the door is open that's not what we will be exposed to as we all know.

Please keep our airways safe.

Thanks for your kind consideration,
