

Permitting nudity and profanity is in no ones interest other than the network producers who cannot provide decent original programming that people want to watch. Thus, nudity and profanity will be a substitute for creativity. It should be noted that in particular children will then be exposed to the depravity that the Hollywood types regard as creativity and their right to free speech. Not all adults will be comfortable with foul language and nudity broadcast into their homes either. Stand up to Hollywood and TV producers and say NO!
