

Your article reveals that the increase in sexual assaults in the military is connected to the sales of pornography on military installations. However, I would like to point out that the sales of pornography on military installations is part of the Extreme Atheist Socialist Democratic Party's voter building scheme in which, in exchange for the vote and the financial support of the pornography industry businessmen and woman the Extreme Atheists in the Democratic Party agreed to unleash them to sell their pornography where ever they desired in American society, including on military installations, through legislation and their Extreme Atheist Socialist judges. This problem is increased by the fact that pornographers businessmen and women from around the world have been allowed to come to the USA and open up businesses as well. The activities of the Extreme Atheist Socialists in the Democratic Party are part of the fulfillment of Rev 18:2, which foretold that Babylon the great, which Jesus revealed to me and sent me out to tell His people is the USA, would become a prison for every unclean spirit, which includes pornography.
