

The FCC is what our families depend on to keep the shows on TV, songs on radio, movies in the theaters and DVDs appropriate for families. The garbage being passed off as entertainment is getting worse and worse. We need the FCC to step up to the plate and start enforcing existing laws and making new ones if necessary. Having minored in psychology and part of it in Child Psychology, it is always stated that children learn more from what is caught than what is taught. What they are "catching" from the entertainment industry is very detrimental to them in so many ways. Please take action to make sure that our children are no longer exposed to the garbage in shows, commercials, songs, video games, etc. Please!
