

I beg of you PLEASE do not allow female frontal nudity and the f-word on general tv. It is highly offensive content to me and my family. It is hard to believe it is even a consideration. That is porn and there are countless studies about how porn adversely affects the human mind. There are plenty of places and PPV channels, not to mention the millions of porn sites online that people can go to satisfy that urge. Please at least keep general tv a place that I don't have to keep out of my home. We already have to carefully choose our programs, but if I changed a channel on accident or something popped up with frontal nudity I would be horrified. It would do no good. Put humanity above what profit\$ you seem to think you may get. Please put the needs of children, of families, above that of twisted, perverted minds. Please re-think this decision. If anything think of the young girls who already compare themselves to models that are dressed! If they have to compare to images of women on tv, where will our women of tomorrow be? Sad, depressed, objectified by themselves and others. Please please, please.
