

Please do NOT allow more nudity and profanity on public TV. Please think of our children and the message this is sending to them, they are equally a part of our society as adults. With today's technology, there are ample areas for adults to get this material in terms of numerous cable, satellite programming etc. that it is not needed on public airways. Even now walking into supermarket can be disturbing at the checkouts especially when you have children who are easily influenced by what they see and are trying to figure out their course in life. For the sake of the younger generations, please let this be an area where they can experience entertainment without the profanity and nudity. Our society gets concerned with the increasing pregnancies among high school and middle school girls, and we wonder why this is becoming a problem? Just look around, and we will find our answer with what our society is telling and teaching them about sexuality and respect for themselves and others. We try to tell our young children, they are people not objects, especially sexual objects, but our society and our actions tells them just the opposite. Is there really a need to allow more nudity and profanity on the public air waves? We teach our children not to use profanity, if they don't experience a place in society without profanity, why then should we expect them not to use it? What good does allowing more nudity and profanity really contribute to our society?
