

I absolutely never want porn or nudity and sex scenes on television. Please keep this type of material off public television where children are watching. Please, please, please I beg of you from mother who's son is severely addicted to porn and master bastion. I know the harmful affects. Because my son shows the signs, lack of confidence, his grades dramatically dropped, he personality changed and he became selfish. I know these don't seem like problems or only small ones if that but from ages 13-almost 18 it has destroyed my Dalton. He is still in counseling every week. Please help these children to stay children I beg you.
